

Tips to Save Money on Medicines

- ▶ Take the medicine your doctor prescribes; if cost is a problem, talk with your doctor about other options. Assistance is available for many expensive prescription medicines.
- ▶ If you are on Medicare or Medicaid, contact Social Security and ask if you are eligible for Medicare Part D. This plan helps pay part of the cost of medicines.
- ▶ Ask your doctor for generic medicines whenever possible. Lists of less expensive generic medicines are available at most pharmacies and online.
- ▶ Pharmacists are good information resources about medication costs and correct medicine usage.
- ▶ Try to use only one pharmacy for all your medications. This can help with record-keeping for costs, deductibles and limits.
- ▶ If you are admitted to the hospital, ask for a case manager who can help you with most of your concerns about paying for your medicines.
